

# SHIPCONSOLE CLOUD

Import orders, validate addresses, freight shop, and print labels; all in one screen with flexible, pay-as-you-go pricing options.

“The ease of use has been the greatest benefit to our organization. We have become more efficient in our outbound preparation and execution due to ShipConsole. Their implementation team was readily available and brought effective solutions to the table. They truly are a valued partner.”

Bill Stuebner,  
 Global Director of Supply Chain  
 Elkay Manufacturing Co.

## How do you streamline your shipping process and reduce your transportation spending?

CHALLENGE	SHIPCONSOLE CLOUD SOLUTION
Data resides in separate silos	All shipping data resides in a single database instance
Lack of ability to pick the service level with the best rate while shipping	Ability to compare rates of different service levels
Different software required for each carrier to ship product	Transact shipments for multiple carriers including UPS, FedEx, DHL, TNT, Stamps.com and USPS – all from the same screen
Inadequate analytics about on-time delivery of shipments and freight costs	Use the embedded BI tool to create reports to monitor key performance indicators
Shipping to wrong addresses or not classifying addresses correctly as residential or commercial	Use Address Validation to ensure all addresses are correct and classified properly
Having to install shipping software locally in various locations	Hosted, cloud-based solution with no need for software installation
High Total Cost of Ownership (TCO) due to hardware and software costs	Flexible pay-as-you-go pricing that fits any budget
Not integrated with your order management system	APIs to integrate with any order management or WMS system

# BENEFITS OF SHIPCONSOLE CLOUD

## Customer Loyalty

Automatically send shipment notifications, get improved analytics, integrated shipment tracking, and instantaneous access to proof-of-delivery.

## Shipping Costs

Use Freight Shopping to control transportation spending and ensure that you are using the best service level and best rate.

## Shipping Efficiency

ShipConsole works with all browsers and all devices. Import orders from any ERP system to transact shipments via multiple carriers from a single screen.

- Zero upfront license costs and reduced hardware costs
- Flexible pay-as-you-go pricing that can be stopped at any time
- Ongoing and automatic software updates to new features and functionality
- High level of security and data protection with all the security features of Amazon Web Services (AWS)
- Hosted on scalable, high-performance AWS infrastructure with load balancing
