ShipConsole
Simple and Complete

OPTIMIZE YOUR ORACLE SCM CLOUD SHIPPING WITH SHIPCONSOLE

ShipConsole is available as Software- as- a- Service (SaaS) on a monthly subscription model

"The ease of use has been the greatest benefit to our organization. We have become more efficient in our outbound preparation and execution due to ShipConsole. Their implementation team was readily available and brought effective solutions to the table. They truly are a valued partner."

Bill Stuebner,
Global Director of Supply Chain Elkay Manufacturing Co.

Mission

To optimize and simplify shipping and logistics for Oracle Applications at an affordable price.

ORACLE
ERP Cloud

Shipconsole makes it easy to integrate Oracle SCM Cloud with freight carriers like UPS, FedEx, DHL and various LTL carriers. Online shipment processing, label printing, shipment tracking, instantaneous proof-of-delivery documentation, and Oracle ship confirmation are all done from a single unified interface in ShipConsole, enhancing productivity and making it the one source for shipment-related information.

The ShipConsole Solution

- Easily create shipments in Oracle SCM Cloud and ship via parcel and LTL carriers
- Capture published and negotiated freight costs for both parcel and LTL carriers and automatically save them back to Oracle
- Complete ship confirm process in Oracle SCM Cloud with the click of a single button
- Ability to ship Non-Oracle Sales Orders
- Automatically send shipment notifications to customers in a variety of formats suitable for many devices including mobile
- Access shipment status and proof-of-delivery documentation instantly
- Print all Oracle shipping documents and carrier labels from one screen
- Consolidate multiple shipments into a single shipment
- Reduce your transportation spending with Freight Shopping
- Verify addresses to eliminate shipment delays and additional service fees
- Screen for Denied Parties
- Print customs documentation or use paperless invoicing
- Analytics support better decision making

Launch ShipConsole right from Oracle ERP Cloud
