

SELF-SERVICE SHIPPING(S3) FOR EMPLOYEES

ShipConsole S3 is designed to simplify departmental shipping in an organization. With this application, users can now validate address, screen denied parties, rate shop, and print shipping labels along with their expenses being tracked to their particular cost centers. It is a browser based application which can be accessed from anywhere your Oracle ERP Cloud is accessed. Employees across the enterprise can leverage ShipConsole Departmental Shipping software to perform quick shipping from their desktops with reduced shipping costs and improved visibility of expense tracking to the respective GL accounts. Using ShipConsole S3, customers can now map the right cost and expense accounts.

- **Seamless integration with Oracle ERP Cloud**

This out-of-box application can be embedded within Oracle ERP Cloud and can be accessed from anywhere

- **Multi-Carrier Shipping**

ShipConsole supports all major parcel carriers UPS, FedEx, DHL, TNT, USPS, Stamps.com. Our solutions supports over 200 carriers worldwide

- **Additional Handling**

International or Hazmat shipments are routed to logistics team to perform shipping

- **Address Book**

You can create address books, import list of addresses into ShipConsole to speed up shipping process

- **Address Validation**

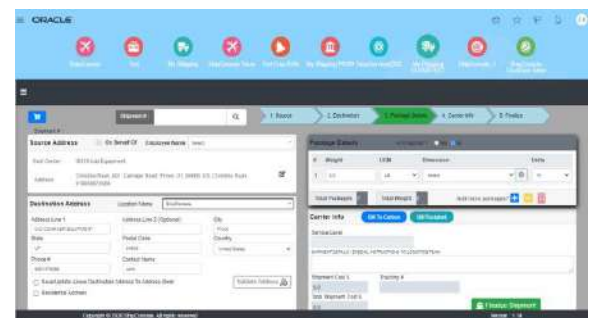

Eliminate address correction charges by verifying ship to address before a package is shipped. You can also classify whether it's a commercial or residential address

- **Rate Shopping**

Always choose the optimal service. Employees can compare between all major parcel carriers and choose the best option

- **Cost accounting**

GL accounts of every department & Employee are mapped to every shipment to capture shipments by department and by cost center

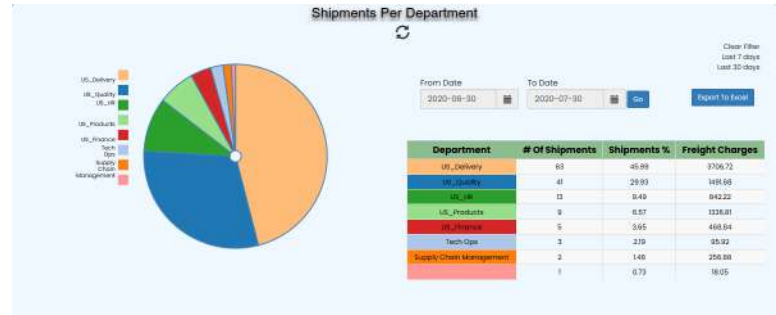

Natively Integrated with Oracle ERP Cloud for multi-carrier shipping, address validation, rate shopping all in one simple, self-service screen.

Key Features:

1. Out-of-box integrated with Oracle ERP Cloud with single sign on.
2. Very flexible for Oracle ERP Cloud users. Irrespective of the cloud service implemented (Sales Cloud / SCM Cloud / HCM Cloud), users can leverage ShipConsole S3 for their shipping needs.
3. Simple and easy to use screen for self-service users to do desktop shipping and ability to print the labels directly from the system.
4. Detailed visibility of the accounting and cost center to which the shipping costs have to be updated back.
5. Auto populated data in the application from Oracle specific to the user who logs into the system which makes it easier to proceed with shipping without having to fill in the details there by reducing the redundancy.

6. Address Book facility to save the destination address for which the shipment is made.
7. Ability to perform shipping on behalf of other employees and from different locations with the employee and locations data auto populated.
8. Analytics reports which will provide bird's eye view of the total shipments made and the costs incurred at department level or cost center level.

Dashboards offer full visibility to shipping data by each department/carrier

Benefits:

- Maximize Savings
- Control Costs
- Save Time
- Ready to use for Oracle ERP Cloud
- Shipping visibility

Shipments with additional handling are routed to logistics queue for further processing
